

SUMMARY

Third-year CCE student at Sri Eshwar College of Engineering with hands-on experience in AI/ML systems, full-stack development, and data science. Passionate about building impactful real-world solutions in fraud detection, credit risk, vehicle health prediction, and agricultural tech.

EDUCATION

B.E Computer and Communication Engineering – Sri Eshwar College of Engineering CGPA: 7.9 (upto 4th Sem)	2024 – 2028
HSC – Srinivasa Vidhyalaya Matric Hr. Sec. School 85.3%	2023 – 2024
SSLC – Srinivasa Vidhyalaya Matric Hr. Sec. School 84.6%	2021 – 2022

INTERNSHIP EXPERIENCES

RAMPeX2025

Full Stack Development – Built and maintained full-stack web features, collaborating on end-to-end application development.

Deloitte Australia2026

Technology Job Simulation (Forage) – Completed practical tasks in coding and development, covering hands-on technology consulting exercises.

PROJECTS

TeamSync – AI-Powered Hackathon & Team Collaboration Platform2026

Built a full-stack platform that discovers 466+ hackathons from multiple sources with India-wide location filtering, bookmarking, AI-powered team matching, and personalized hackathon recommendations. Developed complete team collaboration workflows including team creation, join requests, task assignment, submissions, evaluations, notifications, and an automated replacement-role system for when members leave. Implemented Groq-powered AI chatbot intent routing and deterministic skill-matching algorithms, with JWT authentication and a responsive Next.js interface.

Tech: TypeScript, React/Next.js, Node.js, Express.js, MongoDB, Groq AI, JWT, Tailwind CSS, REST APIs

Notes Saver – Full-Stack Study Notes Platform for Students Worldwide2026

Built a full-stack notes-saving platform enabling students worldwide to capture, organize, and revisit study notes from any device, integrating camera and microphone capture for scanning handwritten notes and recording voice notes, along with AI-powered features for summarization and smart organization.

Tech: React/Next.js, Node.js, Express, MongoDB, WebRTC (Camera/Mic), AI APIs

Crop Recommendation System2026

Built an ML-based crop prediction system with 95%+ accuracy, integrating a live weather API and an NLP chatbot to deliver accessible recommendations to farming communities.

Tech: Python, Scikit-Learn, FastAPI, Weather API, NLP

VehicleIQ – AI Vehicle Health Monitoring & Breakdown Prediction2026

Built an XGBoost + SHAP model for real-time breakdown prediction from sensor telemetry, integrating Twilio WhatsApp alerts and the Google Maps API for nearest service routing. Developed the solution as a full-stack application with a React/Next.js frontend and FastAPI backend, using MongoDB for storage, JWT authentication, and a live fleet health dashboard powered by LSTM/CNN time-series fault detection.

Tech: Python, XGBoost, SHAP, LSTM, FastAPI, React/Next.js, MongoDB, Twilio, Google Maps API

CERTIFICATIONS

- The Complete Java Programmer: From Scratch to Advanced – Udemy (June 2026)
- Concepts of Computer Networks – Udemy (June 2026)
- Mastering Data Structures & Algorithms Using C and C++ – Udemy
- Python Fundamentals – Infosys Springboard
- Cloud Computing – NPTEL
- Guidewire DEVTrails University Hackathon 2026 – Certificate of Participation (Guidewire & EY)
- Expedia Group Hackathon – Participant

CODING PROFILES

LeetCode – Problems Solved: 130 | Global Rank: 15,60,370 | Profile: [Adithyan R](#)

SKILLS

Languages: C, C++, Python, Java, MySQL

Web: HTML, CSS, JavaScript, React.js, Next.js, FastAPI

ML: XGBoost, SHAP, Isolation Forest, LSTM, Scikit-Learn, Regression, Classification, Feature Engineering

Tools: VS Code, GitHub, Jupyter, MongoDB, Postman, Excel

Core: OOP, DSA, DBMS, REST APIs, Computer Networks
